This application is in condition for allowance except for the following formal matters:

The disclosure is objected to because of the following informalities: the specification and claims use terms for the heat exchangers that are contrary to the conventional usage in the art. Heat exchangers 4 and 5 are referred to as "condensers" in the specification and claims rather than "evaporators". Furthermore "compressor" 3 is also referred to in the specification as a "condenser". Heat exchanger 6 is the only "condenser" in the refrigeration circuits of Figures 1 and 2. Conventional terms of art must be used in the specification and claims in order to allow effective text searching of the patent database. Furthermore the reference to claims by number as is done on page 3 of the specification must be removed since the claims are frequently amended during prosecution of an application and may be renumbered when the application is prepared for issue.

Claims 11-19 are objected to under 37 CFR 1.75 (d)(1) as using terms contrary to the conventional usage in the refrigeration art as explained above.

Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
